

IN THE SPECIFICATION:

Please amend the specification as follows:

Please amend page 4, lines 7-14, to read as follows:

-- The temperature sense resistors preferably have a sheet resistance of at least $20 \Omega/\square$ and a temperature coefficient of resistivity of at least $0.0010 \Omega/^{\circ}\text{C}$. More preferably, the temperature sense resistors have a sheet resistance of at least $75 \Omega/\square$ and a temperature coefficient of resistivity of at least $0.0020 \Omega/^{\circ}\text{C}$. Even more preferably, the temperature sense resistors have a sheet resistance of at least $500 \Omega/\square$ and a temperature coefficient of resistivity of at least $0.0030 \Omega/^{\circ}\text{C}$. Most preferably, the temperature sense resistors have a sheet resistance of at least $1000 \Omega/\square$ and a temperature coefficient of resistivity of at least $0.0040 \Omega/^{\circ}\text{C}$.--
